The identity of a practical AI learning company. Brief, run, check, keep.

fieldwork

A brief is the oldest tool for getting work done. Problem, practice, result.

Quiet

Off-white, black and one blue. Hairline rules, tiny mono labels, one huge wordmark. Almost no decoration, so each use of colour carries weight.

Terrain

The field rendered as halftone dots: a dot-matrix terrain that fades into the page. It is the only illustration, plus real photography in hairline cells.

Triple

Every exercise and every sales page is built from Problem, Practice, Result. The result sits in cobalt.

(PERSONALITY)

Practical, plain-spoken, honest about status, quietly confident. Never hype, never jargon, never fear.

(LINES)

Strategic: Learn by doing. Put knowledge to work.
Everyday: Practise AI on real work.

Wordmark, disc and target

(PRIMARY · WORDMARK)

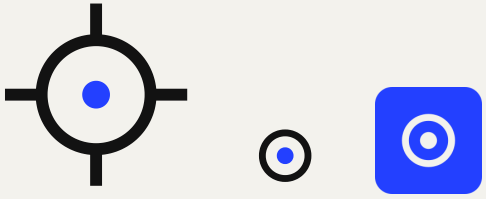

Lowercase Schibsted Grotesk Bold, tracked -6.5%, with the dot of the dotless i replaced by a disc of halftone dots in cobalt. Use for heroes, covers, footers.

(SMALL SIZES)

The disc coarsens below 56px (five dots across) and becomes a plain cobalt circle below 24px. Use the -small files for web headers.

(TARGET ICON)

The survey benchmark (ring, cross-hairs, centre dot). Used as the app icon, favicon, avatar and small mark where the wordmark will not fit.

(DOT-MATRIX DISC AND LOCKUP)

The disc is also a standalone symbol. The lockup pairs the target with the wordmark where an icon is wanted beside the name.

Colourways, space and size

Clear space

Keep a margin equal to the height of the lowercase x on every side. The giant footer wordmark is the one exception: it bleeds and is cropped slightly at the baseline.

Minimum size

Wordmark 20mm / 80px wide. Target icon 6mm / 16px (use the small variant below 24px).

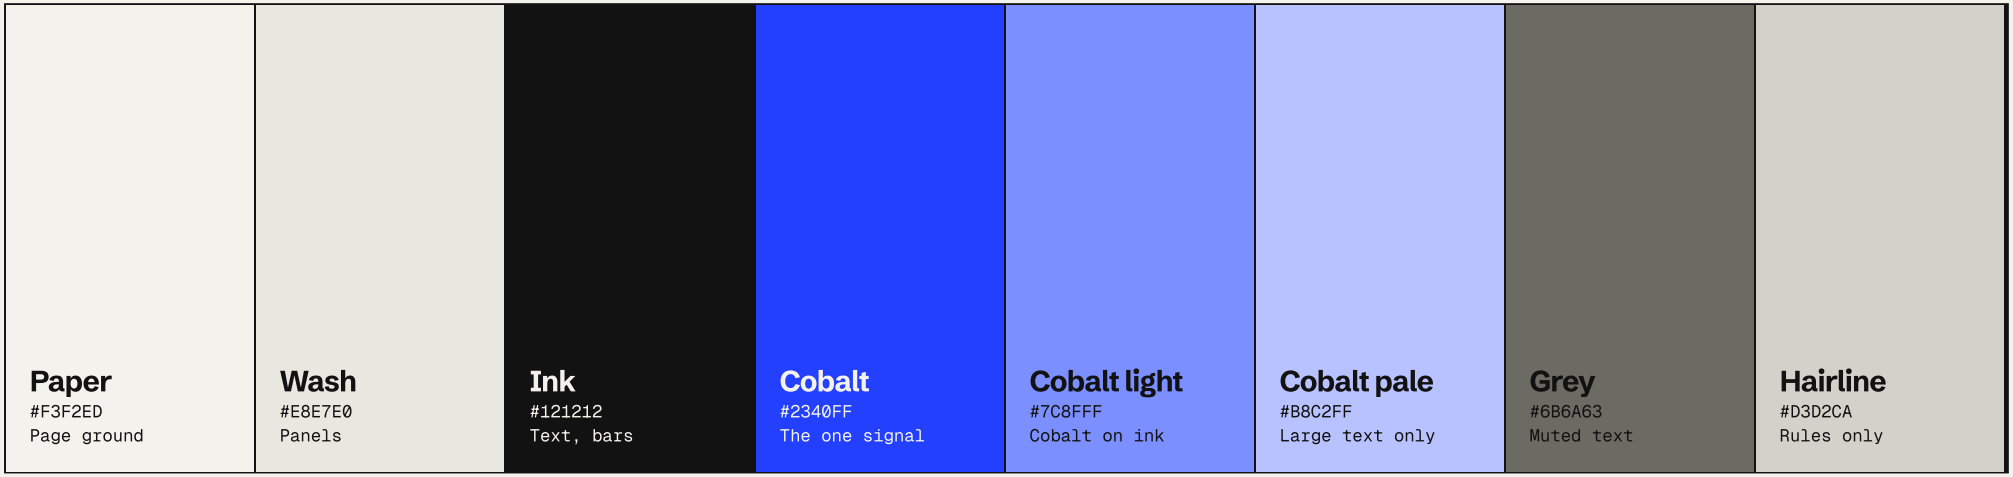

Do

- Use the supplied files only
- Keep the disc cobalt on paper, light cobalt on ink, paper on cobalt
- Use the one-colour version for stamps and print

Do not

- × Redraw, recolour, outline or add effects
- × Set the wordmark in live type
- × Place it on busy photography without a clear cell
- × Use the target and the disc together in one lockup

Paper, ink and one signal

Ratios

Paper about 70%, ink 20%, wash 6%, cobalt under 4%. Cobalt appears as the disc, the terrain, links, and one result panel or band per page.

Contrast (measured)

PAIR	RATIO
Ink on paper	16.7 : 1
Cobalt on paper	5.8 : 1
Paper on cobalt	5.8 : 1
Grey on paper	4.8 : 1
Grey on wash	4.4 : 1 (use darker grey)
Cobalt light on ink	6.4 : 1
Cobalt pale on cobalt	3.8 : 1 (large only)

Learning grammar

Ink is instruction. **Cobalt** is the result. Grey is the aside. Hairlines are decoration, never text.

One typeface, one mono

(SCHIBSTED GROTESK · DISPLAY AND TEXT)

Aa 01

One typeface from hero to footnote. Bold display at -5% to -7% tracking; 400 for text.

(GEIST MONO · LABELS)

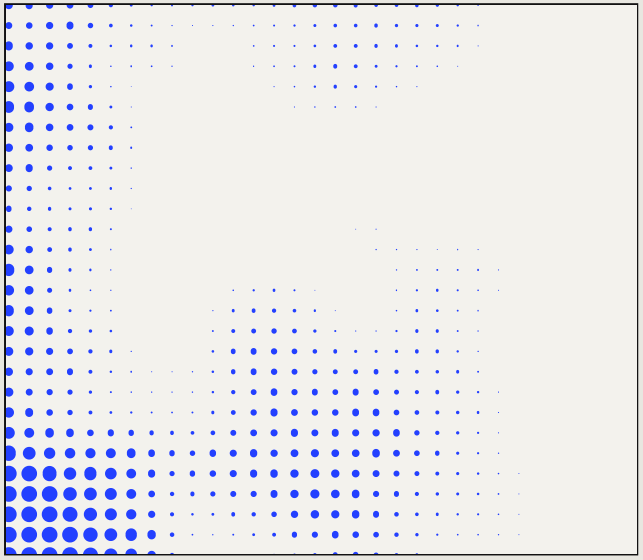

(01) PROBLEM · PRACTICE · RESULT

Numbers, tags, table keys, corner marks, captions. Uppercase, +6% tracking, 11 to 13px.

ROLE	DESKTOP	MOBILE	LEADING	TRACKING
Giant wordmark	viewport width	viewport width	0.78	-7.5%
Hero	up to 93px	42px	0.92	-6%
Section title	up to 80px	37px	0.94	-5%
Body	17px	16px	1.5	0
Label	Mono 12px caps	12px	1.35	+6%

No serif, no italics. Hierarchy comes from scale and rules. Both families are SIL OFL and self-hosted, so the site makes no third-party font requests.

Terrain, corners, hairlines, index

F (02)

Corner marks

Four letters or a page number in the corners of a hero or frame.

Top bar and hero composition

The black bar

A one-line ink bar is the navigation on every page: wordmark at left, pages in the centre in mono capitals, the slogan at right. It stays at the top as you scroll. On phones it keeps the wordmark and a Menu button.

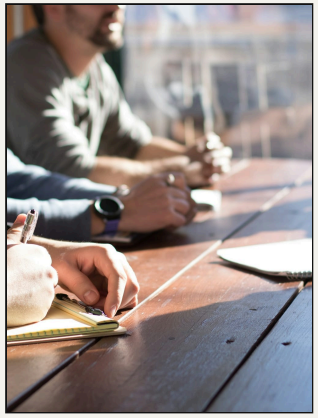

The hero

Corner marks, a large headline with a short note and one link, dot terrain behind at the right, an index of three starter tasks, and the giant wordmark cropped at the bottom. One idea per screen.

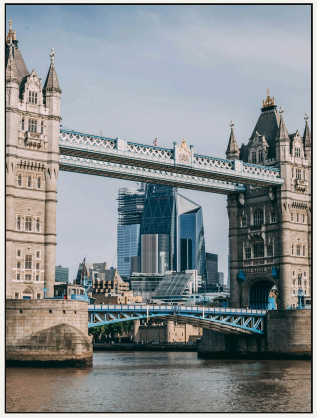

Everything else

Index lists and hairline cells replace card grids. Business pages use the same system with ink bands and Problem / Practice / Result rows.

Terrain and photography

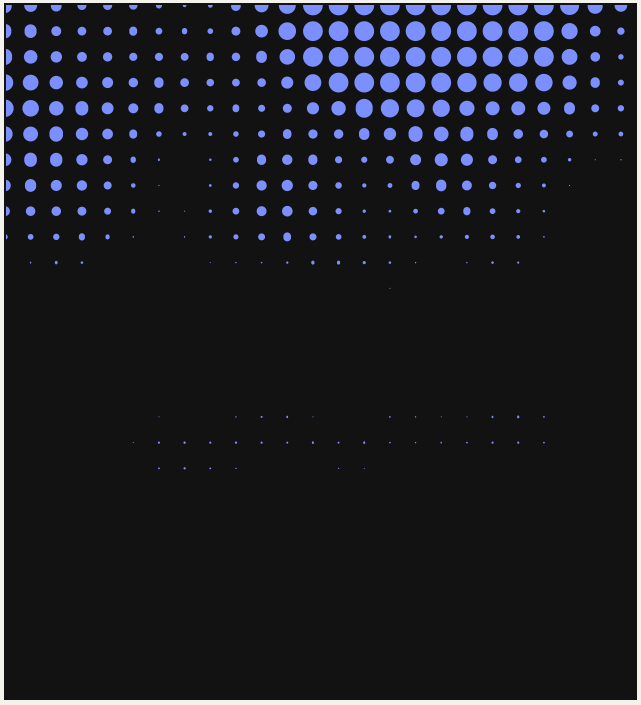

Photography

- Real places and working surfaces: homes, desks, notes, meetings, Lagos and London
- Honest light and colour; no staged handshakes or glowing brains
- Always in a hairline cell, cropped 4:3, 3:2 or 16:9, with a mono caption
- Stock is captioned as illustrative and never implies a client

Terrain

- Generated halftone dots, one seed per piece
- Cobalt on paper, light cobalt on ink, paper on cobalt, ink on wash
- Fades into the page, never boxed; never behind running text

How Fieldwork sounds

Say

- Plain verbs: brief, run, check, keep
- What exists, what is planned, what is untested
- "AI drafts. People decide."
- British spelling, sentence case, short sentences
- As few words as will do

Avoid

- × Revolutionise, unlock, supercharge
- × Guarantees of productivity, compliance or savings
- × Fear of being left behind
- × Invented clients, quotes, statistics

Examples

Headline: Bring one task. Leave with a workflow.
Button: Try the free exercise
Status: Planned, not yet available
Caution: Fieldwork is new, with no agency case studies yet.

What is in the folder

ASSET	LOCATION	USE
