One-pager: AI practice for estate and letting teams

Practise AI on real work.

Practical AI training for estate agencies, letting agencies and property companies in the UK and Nigeria.

The problem we expect to hear. Staff already use AI tools, with no shared rules. Listings read differently from one negotiator to the next. New starters take a long time to become independent. We will check which of these is true for you in a first conversation, not assume it.

What we do. Your team practises on the work it already does, using four moves: **brief, run, check, keep.** They finish with reusable workflow cards and a written AI-use rule they own.

> **AI drafts. People decide.** We never suggest AI should value a property, give legal advice or approve an offer, tenancy or transaction.

Workflows to start with

1. Listings from verified facts
2. Enquiry replies and follow-ups
3. Viewing feedback and vendor or landlord updates
4. Weekly reports and internal notes
5. Procedures turned into checklists for new starters

(Also available: research, marketing posts.)

How it works: a 4-week pilot (illustrative outline)

WEEK 0	WEEK 1	WEEKS 2 TO 3	WEEK 4
Conversation	Rules and briefs	Practice on anonymised, real examples	Review against your baseline

Three sizes: Practice session (one workflow, small team) | Tailored enablement (two or three workflows, a few weeks) | Implementation support (several teams or branches). Scoped and priced after a conversation. Separate UK (GBP) and Nigeria (NGN) pricing.

Where we are honest

- Fieldwork is new. No client case studies yet. We would rather show you a worked scenario than invent a testimonial.
- No guarantees of time saved, cost saved or compliance. We help you measure against your own baseline.

- This is training, not legal advice. UK GDPR and the Data Protection Act 2018 (UK) and the Nigeria Data Protection Act 2023 apply to client data. Take advice on your own duties.
- The onboarding platform is planned, not built, not for sale.
