Capability statement

Fieldwork · Practise AI on real work.

Fieldwork: Capability Statement for Real Estate Businesses

1. Who we are, plainly

Fieldwork is a new training company. We teach practical AI use through real tasks. Our first sector is real estate: estate agencies, letting agencies and property companies in the United Kingdom and Nigeria.

We are new. We have no client case studies, testimonials or published results, and we will not invent any. What exists today is:

- a free guided exercise anyone can try without an account;
- a published method called brief, run, check, keep;
- a workflow assessment on our website that gives a business a first, self-reported view of where practice would help;
- a way of delivering team training that we are now testing with first partner businesses.

If you want an established supplier with a long client list, we are not that yet. If you want a careful, independent provider who will say plainly what we know and do not know, and who will work on your own workflows, read on.

2. What we do

We help property teams get useful, checked results from AI tools on the work they already do: listings, enquiry replies, viewing feedback, research, internal reports, procedures and marketing posts.

We do not sell software, and we are not tied to any AI tool vendor. We recommend tools only for what we have actually tried, and we say when we have not tested something.

3. Our principle

AI drafts. People decide.

A tool can produce a first draft quickly. A person is responsible for what is true, what is sent and what is agreed. We never suggest AI should value a property, give legal advice, or approve an offer, tenancy or transaction. Training teaches staff where a tool helps, where it must not be used, and how to check what it produces.

4. Approach: brief, run, check, keep

STEP	WHAT STAFF DO	WHAT WE PROVIDE
Brief	Write a clear instruction for the tool, including what it must not do.	House brief templates, adapted to your tone and rules.
Run	Use an approved tool on a real (anonymised) example.	Guided practice tasks built from your own kinds of work.
Check	Compare every claim in the output with the source. Mark errors.	Checklists for each workflow, and a method for spotting invented detail.
Keep	Save what worked as a reusable workflow card.	Workflow cards your team owns and can edit after we leave.

Most of the practice is reusable material that people work through in short sessions. A live or remote session is optional, not the core.

5. Workflows we can build practice around

WORKFLOW	AI CAN HELP WITH	PEOPLE KEEP
Listing preparation and editing	First-draft descriptions from facts someone has confirmed	Every fact, from documents. Approval of each listing.
Enquiries and lead follow-up	Draft replies, viewing confirmations, follow-ups	Availability and price. Anything sensitive or negotiated. Sending.
Viewing feedback and updates to vendors or landlords	Summarising and structuring feedback notes	Judging what matters. Keeping negative feedback honest.
Research and organising information	Structuring notes and comparing documents you supply	Choosing sources. Verifying facts.
Internal documents and reports	Turning rough notes or exported figures into a readable summary	The numbers and the conclusions, checked against the source system.
Procedures and new-starter guides	Turning a written procedure into a checklist or quick guide	Accuracy. The procedure owner reviews every output.
Marketing content and social posts	Reshaping verified facts for different channels	Brand voice, claims, approval.

We recommend starting with one or two. Most businesses should not try all seven at once.

6. Safeguards built into the training

1. **A written AI-use rule.** We help you draft a one-page rule for your staff: which tools are approved, what may and may not be pasted, who to ask. You own it and should have it reviewed by your own adviser.
2. **Checking against source, every time.** Each workflow includes a defined check step. Training uses real examples so staff see for themselves the kinds of error a tool can introduce, such as invented details or softened feedback.

3. **A not-for-AI list.** By default: valuations and pricing advice; legal, regulatory or safety statements (tenure, lease terms, planning, certificates, tenancy rights); language that could steer or discriminate, such as who a property is "suitable for" or comments on neighbours and neighbourhoods; approving offers, tenancies or transactions.
4. **Anonymised practice.** Staff practise on placeholders and anonymised examples, so personal data stays out of tools that are not approved for it.
5. **A named human owner.** We ask every client to name one person who owns the rules, the workflow cards and the checks.

7. How we work with data

- **We prefer not to receive personal data.** Practice runs on anonymised or fictional examples. Where we need to see your documents (a procedure, a template, a sample listing), we ask for redacted copies.
- **We agree in writing, before work starts,** what material you will share, how it will be sent, who at Fieldwork sees it, how long we keep it and how it is deleted. [PLACEHOLDER: confirm retention period, storage location and tools used before first engagement.]
- **We do not train AI models on your material.** [FOUNDER TO CONFIRM against the actual tools used and their terms before this sentence is sent.]
- **Regulation differs by country.** UK businesses are subject to UK GDPR and the Data Protection Act 2018. Nigerian businesses are subject to the Nigeria Data Protection Act 2023. Property-sector rules on how properties may be described also differ and change. Our training helps your team follow your own rules. It is not legal advice. Please take advice from your professional body or a solicitor on what applies to you.
- Where we are acting for you in any way involving personal data, a data processing arrangement will be put in place. [PLACEHOLDER: have a solicitor draft.]

8. What we do not claim

- We do not guarantee productivity gains, time savings, cost savings, compliance outcomes, or any particular result. Results depend on how your team uses what it learns. We will help you measure them against your own baseline rather than promise them.
- We do not provide legal, regulatory, valuation or financial advice.
- We have no case studies yet, and our website says so.
- Our onboarding and knowledge platform is a plan. It does not exist, it is not for sale, and we will not take payment for it.
- We are not affiliated with, endorsed by, or partnered with any AI tool vendor, property portal, software supplier or professional body. [Update only if and when this changes, with their written permission.]

9. Delivery formats

Each is scoped and priced after a conversation. We would rather propose a fixed price that you can understand than publish a number that fits nobody.

FORMAT	WHAT IT IS	SUITS
Practice session	A focused guided session for a small team on one workflow, with reusable workflow cards. Live or remote.	Teams of up to about 12 who want to start.
Tailored enablement	A few weeks of guided practice on two or three of your own workflows, with checks, house briefs and a review.	Agencies that want a consistent way of working.
Implementation support	Wider adoption across several teams or branches, including written rules, named owners and simple measures.	Larger or multi-branch businesses.

A typical pilot (illustrative outline, adapted to each client; not a record of work done):

WHEN	WHAT HAPPENS
Week 0	Conversation. Agree one or two workflows, who takes part and what you would measure.
Week 1	Write the AI-use rule and house briefs together.
Weeks 2 to 3	Staff practise on real, anonymised examples. A person checks each output.
Week 4	Compare time and quality against your baseline. Decide what to keep, change or stop.

Delivery works with free tool tiers and mobile connections where needed, so that nobody needs a paid account or fast broadband to take part. Pricing is set separately for the UK (GBP) and Nigeria (NGN), not converted from one to the other.

---

10. Next steps

1. **Try the free exercise** at [WEBSITE]/learn/first-workflow. About 15 minutes, no account.
2. **Take the workflow assessment** at [WEBSITE]/business/assessment. It is self-reported and gives you a first view, not an audit.
3. **Book a 30-minute conversation** to see whether a pilot fits. We will show a worked, fictional listing scenario and ask about your own workflows. There is no obligation.

Contact: [YOUR NAME], [ROLE], Fieldwork. [BUSINESS EMAIL] | [PHONE / WHATSAPP] | [WEBSITE] **Legal entity:** [LEGAL ENTITY NAME], [COMPANY NUMBER / REGISTRATION], [REGISTERED ADDRESS]. [PLACEHOLDER: complete once registered.]

Fieldwork is a trading name. [Verify trademark position before print; see docs/operations/DOMAIN-AND-TRADEMARK.md.] All illustrative scenarios are fictional. Version 0.1.
